

Systemwide Maps

The following maps depict the origin locations of weekday BART customers based on data from BART's 2008 Station Profile Study. The report text and data tables are available in a separate PDF file at www.bart.gov/profile.

The maps are broken out by origin type – Home, Work, and Other.

List of systemwide maps in this file

1. Home Locations of BART Riders (regional)
2. Work Locations of BART Riders (regional)
3. Other Locations of BART Riders (regional)

Note that the data shown on these systemwide maps are not weighted. Therefore, the points show a distribution pattern of riders' origin locations, but not the actual number of riders. Refer to *Appendix B* of the 2008 Station Profile Study report for geocoding details.

Systemwide maps by county and station-level maps are also available at www.bart.gov/profile.

All Station Profile Study maps within this file were created by Nelson Nygaard.

Home Locations of BART Riders

Work Locations of BART Riders

Other Locations of BART Riders*

*Other locations include places other than home or work, such as schools, shopping areas and restaurants.
