

PROJECT MANAGER, CAPITAL

JC: 000259

PB: 9

FLSA: Exempt

BU: 95 (NR)

Created: June 2019

*Class specifications are intended to present a descriptive list of the range of duties performed by employees in the class. Specifications are **not** intended to reflect all duties performed within the job.*

DEFINITION

Under general direction, manages the District's capital projects within the Strategic Planning Department; reviews designs, provides construction management and contract support, and coordinates with other departments; performs related duties as assigned.

CLASS CHARACTERISTICS

This administrator level classification manages major engineering construction or equipment acquisition projects from conceptual planning through completion throughout the District whether accomplished by contract or by District staff and is accountable for further District goals and objectives within general policy guidelines. Positions at this level provide exceptional expertise in a specialized program area and typically independently represent the organization, are subject matter experts possessing highly specialized knowledge, skills, abilities, and experience, and are responsible for a specialty program area that has a major impact on the organization. This classification is distinguished from the Engineering Division Manager classification in that the latter is responsible for the operations and activities of a specified engineering division.

REPORTS TO:

Deputy Director, Group Manager, Engineering Manager or designee

EXAMPLES OF DUTIES - *Duties may include, but are not limited to, the following:*

1. Manages capital program engineering design and construction projects or programs in assigned areas from conceptual design through completion; project areas may include rail car procurement and rehabilitation, stations construction and rehabilitation, automated fare collection, and transit systems and structures design and construction; develops and directs project work standards from design through final program and equipment acceptance.
2. Develops and directs the implementation of goals, objectives, policies and procedures in assigned project areas. Supports strategic and long term planning efforts.
3. Plans, organizes, assigns, reviews and evaluates the work of assigned District and contract staff; manages and directs the work of contract consultants.
4. Directs or participates in the preparation and review of designs, plans, specifications and cost estimates; ensures specifications and contract requirements comply with District standards and policies.

5. Identifies equipment or systems needs on assigned projects; evaluates functional requirements; reviews vendor and manufacturer design and specifications on project equipment and materials; coordinates equipment procurement and testing activities; oversees equipment installation.
6. As assigned, oversees contractor and consultant contracts; develops scope of work; prepares request for proposal; reviews proposals and makes recommendation on selection; assists in contract negotiation and preparation; monitors work activities to ensure compliance with contractual obligations.
7. Performs construction project management duties; prepares cost estimates; prepares and monitors project schedules and budgets; conducts field inspections as required; monitors work in progress; writes, approves, negotiates and executes contract changes; authorizes contract payments upon project completion.
8. Serves as the project liaison with other divisions, departments and outside agencies; negotiates and resolves project issues. Prepares and presents projects to internal and external stakeholders.
9. Provides responsible staff assistance for higher level management staff on projects and related matters.
10. Attends and participates in professional group meetings; stays abreast of new trends and innovations in the field of engineering design and construction.

QUALIFICATIONS

Knowledge of:

- Principles and practices of engineering disciplines in assigned project area
- Principles and practices of engineering design and construction in assigned project area
- Principles and practices of project management
- Principles and practices of contract administration
- Principles and practices used in the preparation of designs, plans, specifications and cost estimates
- Principles and practices of strategic planning
- Methods and techniques of coordinating and scheduling project work
- Methods and techniques of contract negotiation
- Principles and practices of procurement
- Principles and practices of budget development and administration
- Principles of supervision, training and performance evaluation
- Current office procedures, methods and equipment including computers
- Related Federal, State and local codes, laws and regulations

Skill/Ability in:

- Managing, supervising and coordinating assigned projects
- Developing and implementing project goals, objectives and procedures
- Planning, organizing, directing, and coordinating the work of professional staff and contract consultants
- Planning, organizing, scheduling, monitoring and reviewing project work
- Managing project design concepts and solution

Project Manager, Capital

Page 3

- Managing and reviewing project budget analysis, calculations and cost estimates
- Preparing designs, plans, specifications and cost estimates
- Directing or conducting contract negotiations
- Conducting field inspections
- Developing and administering project budgets
